

With an innovative concept and a pioneering approach to valve design, Mead's new technology has directly challenged the conventions of traditional valve manufacturers. In doing so, Mead has overcome many of the restrictions and limitations of conventional valve manufacturing, resulting in a unique design that minimizes valve size, reduces air turbulence and lowers valve costs.

Features & Benefits

- Fast Response
- Simultaneous Electrical / Pneumatic Connection to Manifold
- Thermoplastic - Non Metallic
- Compact & Lightweight
- Low Power Consumption
- High Resistance to Chemicals
- Aerodynamic Flow Passages
- Quick-Change Valve System
- 1/4" or 6mm Integral Push-In Fittings
- Pre-Wired Serial (15 or 25 Pin) Manifold Socket
- No Tools or Lubrication Needed
- Optional Separate Main & Air Pilot Air Feed
- Mount Free Standing, DIN Rail or Panel
- CSA/CE Listed

"Half Shell" Design

The heart of the **Isonic®** concept is its patented "Half Shell", design. Composed of two mirror image halves, **Isonic®** allows its flow channels and internal component compartments to be designed directly into these molded body sections. Assembly is achieved by simply inserting the various valve elements into their corresponding "half-shell" pockets. Internal components are easily positioned to make optimal use of space. The valve is completed by ultrasonically welding the two valve segments, creating a strong bond and hermetic seal. This design totally eliminates the need for fasteners, adhesives, gaskets and inserts.

Maximum Air Flow

Instead of the angular passages of most conventional valves, **Isonic®** internal channels are aerodynamically shaped for maximum air flow and minimal internal friction. Eliminating sharp corners and abrupt changes in direction reduces air turbulence and energy loss. Normally round air passages are replaced by thin, deep, tape-like channels that conserve space and optimize air flow.

Rugged Construction

Molded from a high performance thermoplastic, **Isonic®** is listed with CSA, making this system suitable for many environments.

The 2 Second Push-On Manifold and Valve System

The *Isonic*® MOD 3 manifold system has been designed to virtually eliminate downtime, eliminating all end plates, screws, o-rings and gaskets customarily found in manifold systems. With this "plug-in" design, replacing an individual valve can be accomplished in seconds - simultaneously making an electrical and pneumatic connection, without the aid of any tools!

The *Isonic*® valve series can naturally be implemented as either part of a manifold system or stand alone and have option of either internal or external pilot pressure.

**To Remove Valve Press
Manifold Release**

To Install simply Push Valve onto Manifold

Edge connector requires no wiring and the Valve Ports need no fittings, the MOD 3 modular system is engineered to Push-On, saving time and money on traditional installation.

Versatile

Available in four or eight station segments, the *Isonic*® MOD 3 manifold's unique modular design creates a versatile, expandable control base. The *Isonic*® MOD 3 manifold will accept any combination of different function valves. For larger manifolds, two or more segments can be easily combined to fulfill any needs. The manifold has separate mains and pilot air feed and also allows easy isolation of segments for applications with differential pressures.

Edge Connector

The Slot-In electrical Edge Connector reduces the time and expense needed for wiring and connectors.

Manifold Release

Press to Release valve from manifold.

Quick-Connect Collets - No Fittings Needed

With its unique design *Isonic*® MOD 3 eliminates the need for tube fittings. Built-in, push-to-connect collets allow for fast and easy tube and manifold connections.

Panel or DIN Rail Mounting

Panel Mounted with front or rear screws and can also be DIN rail mounted with clips.

Simplify Wiring Tasks With Prewired Connector and Cable

To further reduce set-up time and installation costs, the *Isonic*® MOD 3 manifold is prewired to accept a single connection. An integrated P.C.B. connects each of the manifold's valve stations. Simply plug in a standard cable to the Sub D connector for quick, clean wiring. A single connector can supply wiring for up to 8 (single or double pilot) valves.

Valve Data

Product / Function	Flow (C _v)	Pressure Range	Vacuum	Orifice Size	Tubing
2/2 Direct Acting or 3/2 Direct Acting	A: 0.03 B: 0.06 C: 0.11	0-120 PSI (0-8.3 Bar) 0-100 PSI (0-6.9 Bar) 0-90 PSI (0-6.2 Bar)	Full Full Full	A: 0.04 (1.0 mm) B: 0.06 (1.5 mm) C: 0.08 (2.0 mm)	ALL MODELS 1/4" (6mm) O.D. Ports 1, 2, 3, 4 5/32" (4mm) Port 14 Optional
4/2 Single Solenoid Pilot Operated	0.80	30-100 PSI (2.0-8.3 Bar)	Full with External Pilot	0.21" (5.3 mm)	
4/2 Double Solenoid Pilot Operated	0.80	15-100 PSI (1.0-8.3 Bar)	Full with External Pilot	0.21" (5.3 mm)	

General

Temperature Range : 0°- 120° F (-18° C to + 50° C)

Media: Air or Inert Gas

Lubrication: Not Recommended

***Filtration:** Coalescing Filter

Duty: 100%

Manual Override: Standard (Pilot Models)

Collets: 1/4" (6 mm) and 5/32" (4mm)

Voltages: DC: 12 V and 24 V
AC: 24 V, 110 V @ 50 / 60 Hz

Seals: Viton® and Nitrile

Body: GE Thermoplastic

Response Time: 10 ms On; 35 ms Off

* Recommended to protect the environment and valve system from potential aggressive synthetic oils

Wiring / 15 & 25 PIN Detail - Cable End (Colors Indicated apply to Mead accessories P(*)-15SDC and P(*)-25SDC)

Numbers near pin lines are the pin numbers. Center information refers to usage (see detailed explanation). Colors indicated on the outside are the wire color of the Mead accessories.

15 Pin Sub-D Connector
(4 Station Manifold Only)

Detailed Explanation: St1 Main = Station 1, Main connection (Used for all valves installed here).
St1 Dbl. = Station 1, Double Solenoid Connection (The second connection for a double solenoid type valve - This is only used for the double solenoid type. Remember double solenoids have two connections.)

25 Pin Sub-D Connector
(8 Station Manifold Only)

NOTE: All Commons are connected internally on both the 4 and 8 Station Manifolds. 28 AWG wire.
